

KEPREX™

Comprehensive Nutritional
and Health Solutions

KEPREX™ is dedicated towards providing a comprehensive nutritional and health solution to help you maintain your product quality and profitable productivity with overall convenience and peace of mind.

Overall Benefits

Convenience

KEPREX™ is a range of comprehensive feed premixes exclusive for ruminants diets, designed in a convenient form for hassle-free feed manufacturing process.

Performance

KEPREX™ is formulated by a team of experienced dairy nutrition professionals considering the nutritive needs of the commercial dairy animals to deliver optimal performance with cost effectiveness.

Quality

Each raw material of KEPREX™ is tested for strict quality control under international standards in globally accredited laboratory.

Technical Support

Apart from providing overall convenience, quality and performance from KEPREX™, we also provide technical support services to ensure that benefits of the program are accurately delivered.

Reclaim Your Peace of Mind

Convenience, Performance and Competitiveness

KEMIN

Trace Minerals
To maintain overall performance & productivity

Vitamins
To maintain critical physiological functions

Rumen Health Modulators
To maintain optimum rumen health and dry matter intake

Mycotoxin Binders
To prevent harmful effects of external contaminants,

MOST ESSENTIAL ADDITIVES FOR CATTLE FEED PREPARATION

Exogenous Enzymes
Crucial for better nutrient utilization from different raw materials

To achieve genetic potential and maintain optimum production performance, proper premixing of critical additives is of paramount importance before adding to final feed mix.

Challenges For Quality Feed Premix Production

KEPREX™

Comprehensive Nutritional and Health Solutions

Composition

Organic Trace Minerals (Kemtrace®)
Highly bioavailable metal propionates for efficient supply of trace minerals at cellular level without any interaction for optimal mineral nutrition.

Vitamins
High quality vitamins with added antioxidants to ensure optimum physiological performance of animal.

Mycotoxin Binders (TOXIN®)
Innovative mycotoxin binding agents which effectively bind with almost all major mycotoxins (Aflatoxin, Zearalenone, etc.) present in feed with minimum in class nutrient binding.

Rumen Health Modulators (YePlus®)
Unique combination of rumen specific active dry yeast (*Saccharomyces cerevisiae*) with Chromium propionate that helps in optimization of rumen environment along with efficient nutrients absorption at cellular level.

Exogenous enzymes (Kenzyme™)
Fortified with major non-starch polysaccharide (NSP)degrading enzymes for better utilization of nutrients from feed and raw materials
