ReproMIN™ Dry

The Reproduction Formula

ReproMin™ is a unique blend of omega - 3 fatty acids, metal propionates and essential vitamins to improve reproductive efficiency in dairy animals

Recommendation:

- To reduce inter calving period
- To prevent cases of repeat breeding
- To improve onset of heat in dairy animals
- To avoid delayed maturity in heifers

Feeding schedule:

- To increase the chances of conception (To prevent Repeat Breeding):
25 g per animal per day for 20 days after A.I or natural service
- As management tool to shorten inter calving period (To prevent Anoestrus):
25 g per animal per day for 45 days after 45 days of calving (45th to 90th day after calving)

Benefits:

- Improves conception rate by minimizing early embryonic deaths
- Reduces time to 1st heat after calving
- Facilitates manifestation of heat symptoms
- Improves growth of genitalia in heifers and prepares for sexual maturity

Availability

500 g pack & 5 Kg pack
